Control

The four great design

Time Schedule:

- Provide an easy way to program a personal schedule.
- Various kind of setting logic for you to choose.

Group & Scene:

- Group up the lights to operate effectively.
- With scene, you can play out your design.

Centralize Control:

- Offer a more effective way to control public lights.
- Allow manager sets up everything in the same device.

Remote Control:

- Control lights whenever and wherever you are.
- Set up immediately without being in the building.

Seeking for stable controlling system?

A smart lighting control box is programmable and features with various function. All the circuit in the area will be centralized to the SLB box. Not only does it controls lightings but it also controls curtains, projector, and more.

What is a friendly interface?

Human machine interface, HMI, enables managers to control and set up everything easily. Every setup will be saved to the apps on your phone as well as the web on your PC.

Finding a unique digital switch?

Digital switch is for controlling the lightings' dimming, on/offs, group and scene. With IS series digital switches, various wall switch can be transformed into programmable digital switches.
